INTRODUCTION

O.B. WILLIAMS COMPANY has provided millwork for many of the Pacific Northwest's finest landmarks since 1889.

As a founding member of the national Architectural Woodwork Institute, O.B. Williams Company has helped create and uphold its industry's most stringent quality standards.

In a world where many have come to expect standardized products, we have continued our tradition of manufacturing custom doors, windows, cabinets, paneling, stairs and mouldings with virtually no limits to their design.

The sophistication of our equipment and our high level of craftsmanship enable O.B. Williams Company to maintain its reputation as the Northwest's quality leader in architectural woodwork.

MOULDINGS are key in defining the style of any architecture. A well-conceived system of mouldings, whether traditional or contemporary, will reflect quality in any project.

O.B. Williams Company mills all mouldings to order, giving customers a full choice of all domestic and exotic woods, cuts, and length structures, with a limitless choice of profiles.

The mouldings shown in this catalog are some of the more popular patterns we run, but in no way limit one's options. We can grind moulder knives to mill any profile desired, whether to match an existing moulding or to create a new one.

Since all mouldings are custom milled, modifications to the profiles are easy to accommodate. For instance, a base moulding shown at 3-3/8" wide actually can be milled to any width. Our sales staff will be glad to discuss options to suit your individual needs.

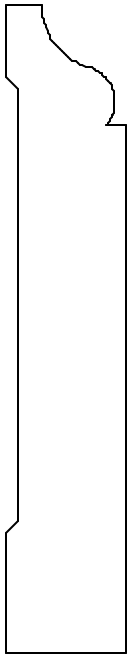

We appreciate your interest in our work and invite your further inquiry.
